Summary

Full Stack Developer with +2 years of experience in designing and implementing scalable web applications. Strong in both frontend and backend technologies with robust problem solving skills, and proficient in modern frameworks and tools with a deep understanding of object-oriented programming, data structures, and algorithm. Passionate about creating innovative solutions in collaborative environments, I am excited to contribute my skills in a dynamic work setting and be part of a team that drives creative success.

Skills & Technologies

- **Databases:** SQL, PostgreSQL, MongoDB (Mongoose), Redis
- **Backend:** NodeJS, ExpressJS, RESTful API, JWT, Joi, OTP Verification, Payment Integration
- **Frontend:** HTML 5, CSS3, JavaScript, ReactJS, React Native EXPO, NextJS, TypeScript, Tanstack Query, Zustand, Hooks, SWR, React Hook Form, TailwindCSS
- **Tools:** Git, GitHub, Postman, Vercel

Experience

React & Next.js Developer Intern — *Code Tech, Gaza (On-site)*

Apr 2025 – Jun 2025

- Implemented advanced React patterns and built reusable components.
- Developed a full-stack project using Next.js with server-side rendering (SSR).
- Integrated APIs into modular React components and optimized UI performance.
- Built modern, responsive UI using design systems and component libraries.
- Collaborated in a team using GitHub for version control and task management.

React Js Developer — *Gaza Sky Geeks, (Remote)*

Jan 2026 – March 2026

- Built applications using feature-based architecture to improve scalability and code organization.
- Implemented server state management and data fetching using TanStack Query, with caching and background updates.
- Handled routing and URL state synchronization using TanStack Router
- Applied design patterns to improve code quality, reusability, and maintainability
- Developed UI components following a design system for consistent styling and user experience.
- Collaborated with team members using Git & GitHub, including pull requests, branch workflows, and code reviews.

Projects

- **ScholarHub – Scholarship Opportunity Platform (Full-Stack Web App) – Graduation Project**

Designed and developed *ScholarHub*, a full-stack web platform that helps students, especially in Gaza, easily find and explore international scholarship opportunities. The platform collects and organizes scholarships in one place, allowing users to browse, search, and filter opportunities based on their needs. Built using Next.js, React, TypeScript, Node.js, Express, and PostgreSQL, it features a responsive interface and structured data presentation to simplify access to educational opportunities and make discovery more efficient.

- Centralized platform for discovering and browsing international scholarships
- Advanced search and filtering system for better opportunity matching
- Structured and categorized scholarship listings for easy navigation
- Full-stack architecture with secure and scalable backend integration
- Responsive and user-friendly interface optimized for all devices
- Focus on accessibility and simplifying access to educational opportunities

- **Matcha – Animated Retail Experience**

Designed and developed *Matcha*, a modern animated e-commerce web application for premium matcha products. Built using Next.js, TypeScript, and GSAP to deliver a highly interactive, cinematic shopping experience with smooth animations and luxury-level UI/UX design.

- Cinematic and smooth GSAP animations for an immersive user experience
- Dynamic product browsing with interactive product cards
- Fully functional shopping cart with smooth micro-interactions and transitions
- Premium UI/UX design focused on luxury and minimal aesthetics
- Highly responsive layout optimized for all devices
- Performance-focused implementation for fast and fluid interactions

- **Cinematic Headphone E-commerce Website**

Built a high-end immersive e-commerce experience for a premium headphone brand, combining cinematic storytelling with modern web technologies. The project features scroll-driven animations, interactive product visualization, and a fully functional shopping experience designed with a luxury dark aesthetic inspired by Apple and Awwwards-level interfaces.

- Cinematic scroll-based animations using GSAP ScrollTrigger
- 3D-inspired product storytelling with frame-sequence animations (WebP optimized)
- Fully responsive premium UI with dark luxury design system
- Interactive product catalog with grid/list views, filtering, sorting, and pagination
- Advanced cart system with animated interactions and modern UX patterns
- Smooth page transitions and immersive hero video integration
- Performance-optimized rendering (frame caching, lazy loading, O(1) frame lookup)
- SEO-optimized structure using Next.js Metadata API

- **JAHEZ — Food Delivery Platform (Mobile)**

Led the mobile development and responsive implementation of a premium food delivery platform, delivering a cinematic user experience with consistent performance across all devices.

- Built a cross-platform mobile app using React Native (Expo) and TypeScript with Expo Router for scalable navigation
- Developed fully responsive UI using NativeWind (Tailwind) with precise safe-area handling across iOS and Android
- Implemented bilingual support (Arabic/English) with custom RTL/LTR system using i18next
- Created smooth, cinematic interactions using React Native Reanimated, gestures, and haptics for premium UX
- Managed state and data flow using React Query and Zustand for fast, cache-first performance
- Built secure API layer with Axios including token refresh, request queueing, and secure storage

- **Tourvisto - Travel Booking**

Built a full-stack travel booking platform using Next.js (TypeScript) and Node.js/Express with MongoDB, designed for seamless itinerary creation and secure payments.

- Stripe integration for secure online payments
- Implemented interactive maps for destination previews
- Developed a responsive admin dashboard to manage users, trips and bookings
- Optimized performance using SSR, SSG, and SWR for API hydration
- Ensured scalability, performance, and clean UI/UX with modern web standards
- Delivered clean, modern UI using Tailwind CSS + Shadcn UI

- **E-Commerce Store**

- Built with React and Express.js for scalable full-stack development
- Used MongoDB for flexible document-based data storage
- Integrated Stripe for secure payment processing
- Role-based access control with Admin Dashboard for managing products and users
- Features include product CRUD operations, shopping cart, user authentication, and order tracking
- Clean and responsive UI for seamless shopping experience

Education

Bachelor of Computer Science — Al-Azhar University, Gaza

Sep 2021 – July 2026

Language

Arabic: Native Language , English: Intermediate
